

# Wolves and Northwoods Carnivores

## Predator Ecology

JANUARY INTERIM

January 2-19, 2020

*The gray wolf has long excited the human imagination. Minnesota, with approximately 2,200 wolves, is home to the largest and only continuous population of wolves in the lower 48 states. As a leader in wolf research, Minnesota is looked upon by other states as well as countries around the world as an example of how wolves and humans can co-exist with research and management.*

### Course Visits Include:

Ely, Minnesota  
MN State Parks  
Wildlife Science Center  
International Wolf Center  
North American Bear Center  
Superior National Forest  
Sandstone Wildlife Management Area  
Minnesota's North Shore of Lake Superior  
Boundary Waters Canoe Area Wilderness  
DNR Biological Field Station

Course Fee: \$2,095

Scholarships Available

Check with your school on Financial Aid Eligibility and pre-approving class absences if there are potential date conflicts
